

6th Grade Science

Hello! Welcome to MSMS. My name is Mark Dembkowski and I am a 4th year science teacher. I have a lot of enthusiasm for science as you will see. This year we are going to do experiments, study physics, chemistry, outer space, ecology, and Earth science. I also run a chess club. It should be pretty cool!

Join Remind101 for important announcements

Please join remind101 to receive important announcements regarding science test dates and other important info. Just text “@dembkowski” to 81010 to be added to my contact list. Other than my school email address, Remind101 is another way that you can contact me.

Website

<https://dembkowski.weebly.com/>

My website gets updated throughout the year. It is divided into each science unit that we will do. It has important resources for students who miss a day and need a copy of the assignments. Worksheets and portions of the textbook will be downloadable from this website. The worksheets and new assignments won't be available until we are ready to do them in class. Keep checking back or contact me through my email if a resource you need is unavailable.

Class Rules

1. Be Respectful
2. Be Responsible
3. Always try your best
4. Participate

Chess Club – about a month into the new school year, after the first round of MAP testing, students with a high enough MAP score in Reading and Math, and who have signed up, will have an opportunity to play chess during SYNC (11:00- 11:30) each day. This is a tremendous amount of fun. After everyone is familiar with the rules, we have class tournaments in many different formats. Also, students can challenge me. At the time of this writing, my record is 227-4 against MSMS students. So, while it is not impossible to beat me, it is a feat that has only accomplished four times in the three years that I've been teaching chess. Good Luck!
